Bat Use Of Abandoned Mines

Abandoned mines are like caves and non-destructive mine closures are those where features such as bat gates, cupolas and other preservation tools have been installed to help bats (or other wildlife depending on the location) use the mines for refuge.

Repurposing Abandoned Mines For Bats & Wildlife ...

Abandoned underground mines provide important roosting habitat for more than half of the 47 bat species in the United States. Bats use mines for rearing young in the summer, hibernating, gathering for social activities such as courtship and mating, night roosting, and for crucial rest stops during spring and fall migrations.

Survey abandoned mines for bat use before closing - USDA

It is important to broaden the scope of these reforms to provide for the safeguarding of all wildlife, especially bats, that live in abandoned mines. Large colonies of many bat species now appear to rely solely on abandoned mines for roost sites, indicating that bat use of mines is more than just a recent phenomenon.
