Biotechnology (commonly abbreviated as biotech) is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2).

### **Biotechnology - Wikipedia**

Genetic engineering, also called genetic modification or genetic manipulation, is the direct manipulation of an organism's genes using biotechnology. It is a set of technologies used to change the genetic makeup of cells, including the transfer of genes within and across species boundaries to produce improved or novel organisms. New DNA is obtained by either isolating and copying the genetic ...

GMO = Genetically Modified Organism GMOs are created in a lab, by inserting a gene from one organism into another unrelated organism, producing plants and animals that would never occur in nature. No long-term safety studies have been done on humans, but animal studies link the consumption of GMOs to an increase in allergies, kidney and liver disease, ADHD, cancer,
