An hour (symbol: h; also abbreviated hr.) is a unit of time conventionally reckoned as 1/24 of a day and scientifically reckoned as 3,599–3,601 seconds, depending on conditions.. The hour was initially established in the ancient Near East as a variable measure of 1/12 of the night or daytime. Such seasonal, temporal, or unequal hours varied by season and latitude.

On a day in 399 BC the philosopher Socrates stood before a jury of 500 of his fellow Athenians accused of "refusing to recognize the gods recognized by the state" and of "corrupting the youth." If found guilty; his penalty could be death. The trial took place in the heart of the city, the jurors seated on wooden benches surrounded by a crowd of spectators.

This year marked the fiftieth anniversary of the birth control pill, which many considered to have empowered women and sparked the sexual revolution. But as this list will show, women have had some control over their reproductive rights for millennia, although some of these ancient birth control methods were admittedly more terrifying than most of the methods in use today.
